Hi, As an Information Systems student, I have a deep interest in the IT field. Always think positive, planned, and creative. I have experience working as a technician. I have actively participated in various courses related to product & project management, software development, and user experience design. Have basic skills in using programming languages such as HTML, CSS, and JavaScript. Have basic knowledge of data retrieval with SQL programming language and MySQL as database management. With that, I am very excited to explore fields such as Product & Project Management, Front-End Web Developer, and Business Intelligence. Fully committed to contributing to the IT industry.
